PROFESSIONAL SUMMARY

Software and Data Engineer with 1.5+ years of experience in large-scale data pipeline development and full-stack application engineering. Delivered pipeline runtime improvement processing 4-5 TB datasets and architected cloud migration frameworks on AWS and Databricks. Proficient in Python, PySpark, SQL, and JavaScript with production experience spanning ETL pipeline optimization, Medallion architecture, and real-time web applications using Node.js and React.js.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C/C++

Cloud & Data Engineering: AWS (S3, EC2, EMR), Databricks, Apache Spark, PySpark, ETL Pipeline Design

Web & Backend Development: React.js, Node.js, Express.js, Flask, RESTful APIs, WebSockets (Socket.io), MongoDB

Tools & Practices: Git/GitHub, Linux, Postman, CI/CD, Agile/Scrum, Code Review

EXPERIENCE

Infosys

Data Engineer (Specialist Programmer)

Hyderabad, India

Dec 2024 – Present

• E.ON UK - Enterprise Data Migration & Architecture (Feb 2026 – Present)

- Architected a reusable PySpark transformation framework to ingest data from multiple enterprise sources (Oracle, SharePoint, SQL Server) into Databricks Lakehouse, standardizing schema validation across **67 data pipelines covering 300+ tables**.
- Evaluated and implemented AutomateDV to automate Data Vault modeling, increasing automation of Hubs, Links, and Satellite tables generation by 75%.
- Implemented incremental loading strategies and automated validation gates, reducing data-inconsistency issues.
- Collaborated with data architects and business analysts to convert migration requirements into technical solutions.

• Charter Communications - Cloudera to AWS Cloud Migration (May 2025 – Dec 2025)

- Contributed to the end-to-end migration of approximately **108 telecom data tables** across **8 source systems**, including Oracle, SQL-based databases, and SFTP, from on-premises Cloudera HDFS to Amazon S3 and EC2.
- Designed scalable data pipelines integrating Amazon S3 for storage and Apache Iceberg tables for full and delta loads, supporting schema evolution for downstream analytics.
- Independently optimized the ingestion of a **5 TB partitioned dataset** using PySpark partitioning, partition pruning, and executor-level configuration tuning, reducing pipeline runtime by **30%**.
- Created technical documentation covering pipeline configurations, data mapping specifications, and migration runbooks for operational use.

• Infosys Mysore Training (Specialist Programmer Trainee) (Dec 2024 – May 2025)

- Completed intensive Big Data Technology training with hands-on experience in **Python, SQL, PySpark, and Unix/Linux**, including technical assessments and a capstone project involving large-scale data analysis using PySpark.

PROJECTS / OPEN-SOURCE

Open Source Contributor - Weblate (6,000+ stars)

Python, Django, REST APIs, Unit Testing

- Fixed Unicode handling for Kashida character validation in Arabic-script translations using regex-based matching and regression tests; merged into **Weblate 2026.8**. [PR 21003](#)
- Refactored the project deletion REST API from synchronous **204** to asynchronous **202** processing with Celery task tracking, OpenAPI documentation, and updated test coverage; merged into **Weblate 2026.9**. [PR 21020](#)

- AI Chess Arena | Frontend | BackendReact.js, Node.js, Express.js, Socket.IO, Chess.js
- Built an interactive AI-powered chess platform that enables autonomous gameplay between LLM providers (OpenAI, Groq, OpenRouter).
 - Integrated multiple LLM providers and implemented dynamic move-generation workflows to simulate real-time AI vs. AI chess matches using FEN-based game state handling.
 - Developed a responsive live game dashboard featuring move tracking, think-time monitoring, captured piece visualization, and downloadable PGN exports.

- Real-Time Chat Application | Frontend | BackendReact.js, Node.js, Express.js, Socket.IO, MongoDB, Google OAuth
- Developed a full-stack real-time messaging platform with Google OAuth authentication, Socket.IO-based communication, and MongoDB-based chat persistence.
 - Implemented real-time messaging, media sharing, and online status updates using WebSockets.
 - Designed a differentiating feature - "Incognito Mode" that bypasses database persistence for privacy-focused conversations.

EDUCATION

Dr. B.R. Ambedkar National Institute of Technology (NIT)Jalandhar, Punjab
B.Tech in Computer Science and EngineeringNov 2020 – 2024

CERTIFICATIONS & ACHIEVEMENTS

- Databricks Certified Machine Learning Associate
- Databricks Certified Generative AI Engineer Associate
- **GH-900** GitHub Foundations Certified
- Infosys Certified Python Programmer
- Solved **1000+** **DSA** problems across platforms including LeetCode, CodeChef, HackerRank, and GeeksforGeeks.
